

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## LIBRARIAN'S REPORT

OFFICE OF THE STATE LIBRARIAN, }  
DES MOINES, IOWA, June 30, 1906. }

*To the Hon. Albert B. Cummins, Governor of Iowa, and President  
of the Board of Trustees of the Iowa State Library:*

SIR,—I have the honor to submit for your consideration my report for the year 1906, covering a period included between the 13th day of June, 1905, and the 1st day of July, 1906. This report for a single year is, as you are aware, a variation from the Code instruction, made necessary by the recent amendment to the Constitution. My next report will assume its biennial form, and will be submitted in the year 1908. The delay in submitting this report is due to the delay of the printer and binder in the issuance of my report for 1905, the same not having appeared as yet and not likely to appear during the present year.

At the close of the thirtieth biennial period in the library's history there were in the State Library proper, not including unaccessioned pamphlets, 88,156 books.

### **Books Added Since Last Report.**

To this number have been added, during the period of one year now closed:

To the Miscellaneous Department.....	4,002
From this Department have been withdrawn.....	62
<hr/>	
Making a net addition of .....	3,940
To the Law Department .....	712
<hr/>	
Total.....	4,652

These accessions make the total record of the State Library proper, 92,808.

Total number of volumes in Historical Department not including bound newspapers, 14,815.

The grand total of record in the three departments of the State Library—Miscellaneous, Law and Historical—107,623.

### **Cataloging Department.**

At the end of the thirtieth biennial period (1904-05), the process of recataloging the Library (begun in 1897) was practically completed. There remains, however, a most important work which has been deferred from year to year, i. e., the cataloging of the many valuable sets of Government documents, at present on our shelves, which fail of complete usefulness through lack of cataloging. It is our intention to proceed with this work as fast as possible, and to make use of the valuable help the Government is offering in the way of printed cards. So important are these publications to students of science, history and economics, that we cannot afford to remain behind in this work.

During the fiscal year, July, 1905, to June, 1906, there were added to the miscellaneous department of the Library, as already reported, 4,002 volumes. During the same period 2,731 volumes were cataloged, leaving a remainder of 1,271 volumes uncatalogued. This number should speedily be reduced to zero, by making a catalog of State documents and by proceeding with the catalog of Government documents already begun.

Since April, 1905, no hand-written cards have been added to the catalog. A typewriter is now used for cataloging all books for which cards can not be bought from the Library of Congress. The use of printed and typewritten cards is a decided improvement, saving time and adding greatly to the general appearance and legibility of the catalog.

The purchases of cards from the Library of Congress, during the last year, have aggregated about \$30. The number of cards bought will steadily increase, as the scope of that library's stock of cards is constantly enlarging.

### **Legislative and Sociological Reference Work.**

Without any special appropriation, or additional assistance, we have unofficially organized within our library a Legislative and Sociological department, in which we are gathering much material bearing upon legislation in other states and prospective legislation in our own State. My assistant, Miss Rosemond, has been given special charge of the Miscellaneous portion of the work, and Mr. Small, of the Law department, that portion of the work covering legislative enactments in Iowa and other states. From letters received and personal assur-

ance given in response to letters sent out by me to legislators, I am satisfied that there is in this field of research a large opportunity for usefulness to the State. Already Wisconsin has a Legislative Reference department, backed by an annual appropriation of \$4,500. Rhode Island and other states have similar organizations with smaller resources. The California State Library, with an annual appropriation from fees averaging about \$40,000 to draw upon, needed nothing additional for this service. Should our experience with the incoming legislature fulfill our expectations, my judgment is that it will be our duty to ask the Thirty-third General Assembly to appropriate a small sum for the further development of the work. This will be all the more necessary because, meantime, the Miscellaneous department of the State Library will have been removed to the east wing of the Historical building, thus dividing our force of assistants.

#### **A Resultful Year.**

The past year has been one of unusual and resultful activities. In addition to many valuable sets of standard works and individual books of permanent value, we have collected large quantities of documents toward the completion of incomplete sets, national, state and associational. These in the main are classified and shelved so systematically that they can be reached as easily as our standard reference books and periodicals.

#### **Removal Still Unaccomplished.**

The incomplete condition of the Historical building, the east wing of which has been devoted to the State Library, and the inadequacy of the appropriation last May for completing and furnishing same will throw upon the Thirty-second General Assembly the necessity of an additional appropriation of at least \$100,000. Should a less sum be appropriated, it will, I fear, be found impossible to occupy more than a single floor of the east wing, thus compelling the library to continue for two years, or more, the annoying and embarrassing, tentative policy in operation during the past five years, and depriving the State of the advantages and benefits which might accrue from a completion and furnishing of the entire building.

#### **Hall of Archives.**

The necessity of completing the building is the more urgent because of the fact that the "Hall of Archives" created by the

Thirty-first General Assembly, is yet a hall only in name, no part of the Historical building having been set apart for the important work undertaken by the new department.

#### **Financial Statement and Lists.**

Following this general report is a detailed financial statement showing the receipts and disbursements of the librarian under the direction of the Board, during the year covered by this report. Following the statement is a list of the books acquired by the Miscellaneous department during the current year. The Miscellaneous works, exclusive of documents, are listed alphabetically for easy reference, first by subjects and again by authors. Perhaps I should repeat what has been said in other years, that appended to the list are the letters and numbers indicating the classification of the books purchased, for the benefit of librarians in the smaller libraries of the State who have not at hand the means, and many of whom have not the necessary experience, to enable them to classify and catalog current works in strict accordance with scientific principles as developed in the Dewey decimal system of classification.

#### **Acknowledgments.**

I am pleased to acknowledge the unvarying courtesy and patience extended me by the members of the Library Board and the cordial coöperation of Curators Aldrich and Small in their respective departments, and by my immediate library assistants, Miss Lee, Mrs. Russell, Miss Rosemond and Miss Steele.

Respectfully submitted,

JOHNSON BRIGHAM,  
*State Librarian.*

**Additions to The General Library, June 30, 1905, to June  
30, 1906.**

**Explanation.**

This list is on the same general plan as the one last published.

All classified and cataloged material is found, both in the subject and author list. Such Government publications as still remain uncataloged are grouped with the State documents and publications of other governments in an alphabetical arrangement.

The author list is arranged alphabetically, and is especially strong in full names, since it is designed to serve as a reference book for catalogers whose reference works are limited in number.

The class list is arranged numerically, according to the Dewey decimal system of classification—an outline of which precedes the list.
